

NIKOLAY STOYANOV

AI-native Full-Stack Developer

Ruse, Bulgaria | +359 897 949 326 | lobido1988@gmail.com

Portfolio: nikolay-ai-native-developer.vercel.app | GitHub: github.com/Niko5886 | LinkedIn: linkedin.com/in/nikolay-stoyanov-a79891356

PROFESSIONAL SUMMARY

AI-native Full-Stack Developer with 3 years of hands-on experience building and deploying production web applications in the JavaScript/TypeScript ecosystem. Expert-level, professional command of Claude as a daily production toolset — Claude Code (agentic CLI/IDE development), the Anthropic Claude API, Claude Desktop, and custom Model Context Protocol (MCP) connectors — used to architect, build, deploy and maintain projects end-to-end. Backed by a prior engineering career in industrial automation and CNC/robot programming in Germany, bringing precision, logical problem-solving and an automation-first mindset to software. Holder of 14 technical certifications from Bulgaria and Germany, including SoftUni's AI engineering track (Software Technologies with AI — final score 6.00/6.00).

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js (App Router, ISR, Server Actions), HTML5, CSS3, Tailwind CSS, Framer Motion, Angular, Vue, Bootstrap, Responsive / Mobile-First Design, DOM, AJAX

Backend: Node.js, REST API development, Authentication & Authorization (JWT, bcrypt), CRUD, Role-Based Access Control (RBAC)

Databases & CMS: PostgreSQL (Supabase, Neon), SQL, Drizzle ORM, Row-Level Security (RLS), Sanity CMS, Headless CMS architecture

Claude — Expert / Professional level: Claude Code (agentic CLI + IDE development), Anthropic Claude API, Claude Desktop, custom Model Context Protocol (MCP) connector development

AI & Agentic Development: GitHub Copilot, Cursor, prompt engineering, AI agent workflow design, agentic/AI-first delivery pipelines

Tools & Platforms: Git, GitHub, Netlify, Vercel (deployment & CI), VS Code, WordPress (REST API), OOP, QA testing principles

EXPERIENCE

AI Full-Stack Developer

Jun 2026 – Present

Yuli Tonkin Business & Mentorship Academy (tonkin.bg) — Remote

- Build internal AI tooling and production web apps, running end-to-end agentic development with Claude Code and the Anthropic Claude API.
- Engineered two custom Model Context Protocol (MCP) connectors integrating Claude with Basecamp (project management, ~40 tools) and Make.com (automation scenarios, data stores, webhooks), including a resilient Windows TLS and startup layer for reliable desktop operation.
- Developed "Wheel of Life" — an interactive React / TypeScript + SVG self-assessment app with PNG export, used in the academy's coaching methodology.

Freelance Full-Stack & AI Developer

Jan 2024 – Jun 2026

Self-employed — Ruse, Bulgaria (Remote)

- Designed, built and deployed 9+ production websites and web applications for 8 clients as a solo developer, owning the full lifecycle: requirements, architecture, development, deployment and maintenance.
- Ran an AI-first delivery workflow: structured prompt specifications for Claude Code agents, agent plan review before implementation, and mandatory type-safety gates (TypeScript, `tsc --noEmit`) on every change.
- Implemented secure authentication and Role-Based Access Control with Supabase, including Row-Level Security (RLS) policies for strict Admin/User data isolation.
- Integrated headless CMS solutions (Sanity) enabling non-technical clients to manage content independently.

CNC & NC Automation Programmer

May 2018 – Dec 2023

Sauerburger Traktoren und Gerätebau GmbH — Ihringen, Germany

- Progressed from CNC Machine Operator to CNC Specialist to NC Automation Programmer over 5+ years at a German engineering manufacturer.
- Programmed and automated laser-cutting machines, press brakes and industrial robots (NC/CAM programming, robot teaching) — building the precision, logic and automation-first mindset that now underpins my software work.

Earlier Experience — Dispatcher & Logistics

Mar 2015 – Apr 2018

Noerpel-Gruppe — Teningen, Germany

SELECTED PROJECTS

Dana Vitan Boutique — E-commerce platform (client project)

Next.js 16, React 19, TypeScript 5, Tailwind CSS 4, Framer Motion, Sanity CMS

- Built a complete e-commerce frontend: cart system (React Context, animated drawer), category filtering with URL synchronization, and an animated cinematic homepage.
- Integrated Sanity CMS Studio (embedded at /studio) for independent content management; migrated 54 products via an automated script; Incremental Static Regeneration with 60s revalidation.
- Implemented checkout logistics with Speedy and Econt courier office locators for the Bulgarian market.

Event Planner — Web + mobile application (SoftUni "Full-Stack Apps with AI" capstone)

Next.js, TypeScript, Drizzle ORM, Neon (PostgreSQL), Server Actions, JWT, bcrypt, Expo

- Architected a full-stack event-planning platform with secure JWT authentication, a PostgreSQL data layer via Drizzle ORM, and a companion Expo mobile app — developed end-to-end with an AI-agent workflow.

Nymerix Ltd — Corporate website (client project)

Next.js, custom design system (Deep Charcoal / Strategic Yellow), Netlify

- Delivered a 6-route Bulgarian corporate marketing site end-to-end, from design-system definition to deployment.

Additional projects: Restaurant "The Old Florence", AT Group, Hairdresser Gloss, Courtney Barnett artist site, and more — live demos in the portfolio.

CERTIFICATIONS & TRAINING (14)

SoftUni (Bulgaria): Software Technologies with AI (final score 6.00/6.00) · Full-Stack Apps with AI · Introduction to Programming with AI · VibeCoding · JS Applications · JS Advanced · JavaScript Fundamentals · Programming Basics

Certified training (Germany): Frontend Developer & Web Design (combined certificate) · JavaScript Developer (AJAX, DOM, SPA) · React JavaScript Library · Java Developer (OOP, GUI, Databases) · Programming with Python · Web Design with HTML, CSS & Dreamweaver

LANGUAGES

Bulgarian (native) | German (professional working proficiency) | English (professional / technical)
